

# Algebraic Concepts II *Optional* Summer Assignment

Welcome to Algebraic Concepts III! This cover page will provide you with all necessary information you will need to complete the *optional* summer assignment in this course. It is **not** required for you to complete this assignment, but it is strongly recommended you work through these questions in order to stay fresh with your math skills and give yourself the best opportunity to be prepared in the fall.

## **Materials:**

You will need the following materials to complete the summer assignment and be prepared for the first day of class:

- Internet access
- [TI-84 Graphing Calculator](#) (you do not need to get the color edition)
- Pencils, loose-leaf paper, and a binder

\*\*There is no textbook needed for this course.

## **Directions for Completing the Summer Assignment:**

- Go to [www.khanacademy.org/join](http://www.khanacademy.org/join) and enter the class code: 24B8CFU7. You will need to create an account in order to access the videos and questions.
- Complete assigned videos, exercises, quizzes, and tests. You should aim for 90% mastery of the assigned topics. You can retake any of the assessments until you have achieved that mastery.

If you have any questions, please email Michelle Gavin ([mgavin@solebury.org](mailto:mgavin@solebury.org)). I look forward to this year in Algebraic Concepts III!
